- React.js
- Writing Tests with Mocha/Chai
- AJAX communication with APIs

Deployment and Databases

- Heroku
- Git
- MySQL
- MongoDB
- Firebase

Node.js (Server Side)

- Express
- Security and Session Storage
- User Authentication
- MERN Stack

Applications Built

Denver's Rail System Station Guide

Technologies Used: HTML, CSS, Bootstrap, Express, Firebase, and APIs

Frontend: HTML and Bootstrap styling to make the UI clean and easy to use

Backend: Used an Express server to run the site and Firebase for the database where we grabbed the data from the tables to display it on the frontend. Also used multiple APIs to give our app more utility.

Octothorpe (Education Tool)

Technologies Used: HTML, CSS, Bootstrap, React.js, Express, MongoDB, Facebook and Google Authentication, Axios, Node.js

Frontend: Built in React.js we used the JSX to set up the HTML. Bootstrap for styling.

Backend: Express and Node.js for the server side of the app. Used MongoDB to save all our data and pull the videos down to the frontend.
